

# CLAUDIU LIMBAN

<FRONT END DEVELOPER />

+4 0756 167 934      claudiu.limban@gmail.com  
Oradea, Romania

## EXPERIENCE

### Senior front-end engineer Gainfully (May 2022 - June 2024)

Part of a small agile team developing a client based management system. Initially built on Vue2, Vuex and Vuetify, we've now transitioned to Vue3, Pinia and Quasar and all the edge technologies that come with it. We've cleaned the code, improved the architecture and implemented standards across the dev team.

### Senior front-end engineer UpWork (Mar 2020 - 2022)

Member from the start on the small team that initially built Catalog based on Vue.js 2 which became a huge part of UpWork. I lead subteams for building features, I've engaged in feature development, creating and design, to actually coding it, QAing it, deploying to production and finally help evaluating the end product.

### Lead front-end Buspaket (Sep 2017 - Jul 2019)

It was an almost 2 years Vue.js project as an internal app for a german travel agency. I did the front-end architecture from start to finish and worked alongside a great team implementing a complex user, travel and clients management application. As with every project I've learned quite a few new things.

### Front-end on a few mentionable startups (2015 - 2017)

Qordoba.com (2015) - artificial intelligence company offering SaaS  
Mokus.io (2015 - 2016) - digital agency  
Siminn.is (2016 - 2017) - telecom company in Iceland  
SpaceAngels.com (2017) - capital for early-stage space ventures

### Front-end Nabbesh.com (Sep 2012 - Dec 2013)

A skills marketplace designed for the Middle East. It was my first contact with Django - python. The client was happy with my initial cleanupwork I ended up refactoring about 70% of the site. It was really fun to work with the Dubai team and I feel I made friends.

## EDUCATION

### Bachelor of Computer Science June 2013, "Politehnica" University of Timișoara, Romania

## SUMMARY

I'm a seasoned front-end developer and I try to leave every bit of code I touch more readable, performant, modular, more accessible than I found it. I aim to become an expert and achieve the guru status in Vue.js

## SKILLS

vue3    nuxt3    quasar    vuetify  
javascript    html5/css3    scss/less  
lodash/fp    jest    rest  
page load optimization    pwa  
git    npm    responsive design

## HOBBIES

## LANGUAGES

Romanian (Native)  
English (Proficient)
